Sat, 06 Oct 2018 05:04:00 GMT - completing the square. 5.5 Completing the Square 283 Solving a Quadratic Equation if the Coefficient of x^2 Is 1 Solve $x^2 + 10x + 3 = 0$ by completing the square. SOLUTION $x^2 + 10x + 3 = 0$ Write original equation. $x^2 + 10x = -3$ Write the left side in the form $x^2 + bx$. $x^2 + 10x + 25 = -3 + 25$ Add $\frac{1}{2}$ of $20 = 25$ to each side. $(x + 5)^2 = 22$ Write the left side as a binomial squared.

Thu, 11 Oct 2018 21:47:00 GMT - 9 is a square number, or complete square. This means that it is the result of squaring another number, or term, in this case the result of squaring 3 or 3^2 . $9x^2$ is a complete square - it is the result of squaring x . So simply square-rooting both sides solves the problem. Example Consider the equation $x^2 = 5$.
