The Essential Difference: the male and female brain -

- The Female Brain is a 2006 book by the American neuropsychiatrist Louann Brizendine. The main thesis of the book is that women's behavior is different from that of men due, in large measure, to hormonal differences. Brizendine says that the human female brain is affected by the following hormones: estrogen, progesterone, testosterone, neurotransmitters, and that there are differences in the architecture of the brain that regulates such hormones and neurotransmitters.
